

SRA 300

Joiner's square

The professional tool for precise measuring, scribing, and marking.

The SRA is a top-quality 300-mm square, designed for precise measuring, scribing, and marking of angles and lengths. Specially designed for professionals in the woodworking industry, its precision workmanship, robust materials, and well-thought-out features make it a standout tool. The extendable handle rest ensures a workpiece grip you can trust. Marking surfaces for 90° and 45° angles, and scribing notches in a practical 5-mm grid, make work easy, accurate, and efficient.

Highlights

- Extendable handle rest for stable grip and precise work
- Scribing notches in 5-mm increments for exact, parallel lines
- Angle markings at 10°, 15°, 20°, 30°, 50°, 60°, 70°, and 80°
- Built-in scriber for precise markings and for positioning the square
- Stop surfaces for exact 90° and 45° markings
- Lasered scale on both sides – high contrast and easy to read
- Robust steel blade with a lightweight aluminum handle – durable, precise, and easy to handle
- An abrasion- and dirt-resistant coating for consistently clean results

The extendable handle rest ensures that the square rests stably on the workpiece while working.

SRA 300

Item no.	56014601
EAN	9002719046615

Technical data

Item description	Joiner's square
Blade material	Spring steel
Blade surface	Coated
Handle material	Aluminum, die-cast
Handle surface	Coated
Color	Black
Graduations	mm/cm, 2-piece
Scale grid	1 mm
Angular dimension	10° to 90°
Scribing notches	5-mm grid
Length	300 mm

Applications

- 90° angle
- 45° angle
- 10–90° protractor
- Marking and scribing aid
