

HammerProbe Compact Serie

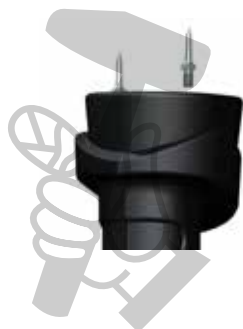

Robust, external hand-held electrode

This robust, external hand-held electrode is particularly suitable when frequent measurements are taken on wood and soft materials. The ergonomically shaped grip allows the electrode to be easily pushed into the item to be measured. It can be used with DampFinder Compact Plus, DampMaster Compact Plus and MultiWet-Master Compact Plus products.

TECHNICAL DATA

- Ideal for when frequently measuring wood and soft materials
- Easy to push into the item to be measured thanks to the ergonomic grip
- Can be used with DampFinder Compact Plus, DampMaster Compact Plus and MultiWet-Master Compact Plus
