The European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and shall be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction may only be made with the written consent of the issuing Technical Assessment Body. Any partial reproduction shall be identified as such.

This European Technical Assessment may be withdrawn by the issuing Technical Assessment Body, in particular pursuant to information by the Commission in accordance with Article 25(3) of Regulation (EU) No 305/2011.

Specific Part

1 Technical description of the product

The fischer Bolt anchor FBN II and FBN II A4 is an anchor made of zinc plated, hot-dip galvanised or stainless steel which is placed into a drilled hole and anchored by torque-controlled expansion.

Product and product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in Section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in Annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.

3 Performance of the product and references to the methods used for its assessment

3.1 Mechanical resistance and stability (BWR 1)

| Essential characteristic | Performance |
|---|-----------------------|
| Characteristic resistance for tension and shear loads in concrete | See Annex C 1 and C 2 |
| Edge distances and spacing | See Annex C 1 and C 2 |
| Displacements under tension and shear loads | See Annex C 3 |

3.2 Safety in case of fire (BWR 2)

| Essential characteristic | Performance |
|--------------------------|--|
| Reaction to fire | Anchorages satisfy requirements for Class A1 |
| Resistance to fire | No performance determined (NPD) |

3.3 Safety in use (BWR 4)

The essential characteristics regarding Safety in use are included under the Basic Works Requirement Mechanical resistance and stability.

4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base

In accordance with guideline for European technical approval ETAG 001, April 2013 used as European Assessment Document (EAD) according to Article 66 Paragraph 3 of Regulation (EU) No 305/2011 the applicable European legal act is: [96/582/EC].

The system to be applied is: 1

European Technical Assessment

ETA-07/0211

English translation prepared by DIBt

5 Technical details necessary for the implementation of the AVCP system, as provided for in the applicable European Assessment Document

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited at Deutsches Institut für Bautechnik.

| | Stainless steel | A4 | | | ✓ | | |
| | Static and quasi-static loads | | | | ✓ | | |
| | Reduced anchorage depth | | - | | ✓ | | |
| | Uncracked concrete | | | | ✓ | | |

Base materials:

- Reinforced and unreinforced normal weight concrete according to EN 206-1:2000
- Strength classes C20/25 to C50/60 according to EN 206-1:2000

Use conditions (Environmental conditions):

- Structures subject to dry internal conditions (FBN II (zinc plated / hot-dip galvanized), FBN II A4)
- Structures subject to external atmospheric exposure (including industrial and marine environment) and to permanently damp internal condition, if no particular aggressive conditions exist (FBN II A4). Such particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used)

Design:

- Anchorages are to be designed under the responsibility of an engineer experienced in anchorages and concrete work
- Verifiable calculation notes and drawings are to be prepared taking account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.)
- Anchorages under static or quasi-static actions are to be designed in accordance with:
 - ETAG 001, Annex C, design method A, Edition August 2010 or
 - CEN/TS 1992-4:2009, design method A

Installation:

- Anchor installation carried out by appropriately qualified personnel and under the supervision of the person responsible for technical matters of the site
- Hammer or hollow drilling according to Annex B3
- In case of aborted hole: New hole must be drilled at a minimum distance of twice the depth of the aborted hole or closer, if the hole is filled with a high strength mortar and only if the hole is not in the direction of the oblique tensile or shear load

Table B1: Installation parameters

| Type of anchor / size FBN II, FBN II A4 | M6 | M8 | M10 | M12 | M16 | M20 |

| Installation safety factor | $\gamma_2^{1)}=\gamma_{inst}^{2)}$ [-] | | | 1,0 | | | |

¹⁾ Parameter relevant for design according to ETAG 001, Annex C

²⁾ Parameter relevant for design according to CEN/TS 1992-4:2009

³⁾ Use restricted to anchoring of structural components which are statically indeterminate

fischer Bolt Anchor FBN II, FBN II A4

Performances

Characteristic values of shear resistance for standard and reduced anchorage depth

Table C3: Displacements due to tension loads

| Type of anchor / size FBN II, FBN II A4 | | M6 | M8 | M10 | M12 | M16 | M20 |
|---|-------------------------|-----|-----|-----|--------------------------|------|--------------------------|
| Standard anchorage depth | $h_{ef, sta}$ [mm] | 30 | 40 | 50 | 65 | 80 | 105 |
| Tension load C20/25 | N [kN] | 2,8 | 6,1 | 8,5 | 12,6 | 17,2 | 25,8 |
| Displacements | δ_{N0} [mm] | 1,9 | 0,6 | 0,9 | 1,5 (1,9 ¹⁾) | 1,8 | 1,8 (2,0 ¹⁾) |
| | $\delta_{N\infty}$ [mm] | | | | 3,1 (2,7 ¹⁾) | | |
| Reduced anchorage depth | $h_{ef, red}$ [mm] | | 30 | 40 | 50 | 65 | 80 |
| Tension load C20/25 | N [kN] | - | 2,8 | 6,1 | 8,5 | 12,6 | 17,2 |
| Displacements | δ_{N0} [mm] | | 0,4 | 0,7 | 0,7 | 0,9 | 1,0 |
| | $\delta_{N\infty}$ [mm] | | | | 1,6 (1,7 ¹⁾) | | |

¹⁾ Values for FBN II A4

Table C4: Displacements due to shear loads

| Type of anchor / size FBN II, FBN II A4 | | M6 | M8 | M10 | M12 | M16 | M20 |
|---|-------------------------|-----|-----|------|------|------|------|
| Shear load FBN II | V [kN] | 3,4 | 7,6 | 12,0 | 17,9 | 31,5 | 38,2 |
| Displacements FBN II | δ_{V0} [mm] | 0,7 | 1,5 | 1,6 | 2,0 | 3,0 | 2,6 |
| | $\delta_{V\infty}$ [mm] | 1,1 | 2,3 | 2,4 | 3,0 | 4,5 | 3,9 |
| Shear load FBN II A4 | V [kN] | 3,0 | 7,3 | 11,6 | 15,7 | 29,1 | 49,0 |
| Displacements FBN II A4 | δ_{V0} [mm] | 1,5 | 1,4 | 2,1 | 2,6 | 2,7 | 4,6 |
| | $\delta_{V\infty}$ [mm] | 2,3 | 2,2 | 3,2 | 3,9 | 4,1 | 7,0 |
