

40V Max Brushless 600mm / 750mm Hedge Trimmers

HEAVY DUTY BRUSHLESS

Product Statement

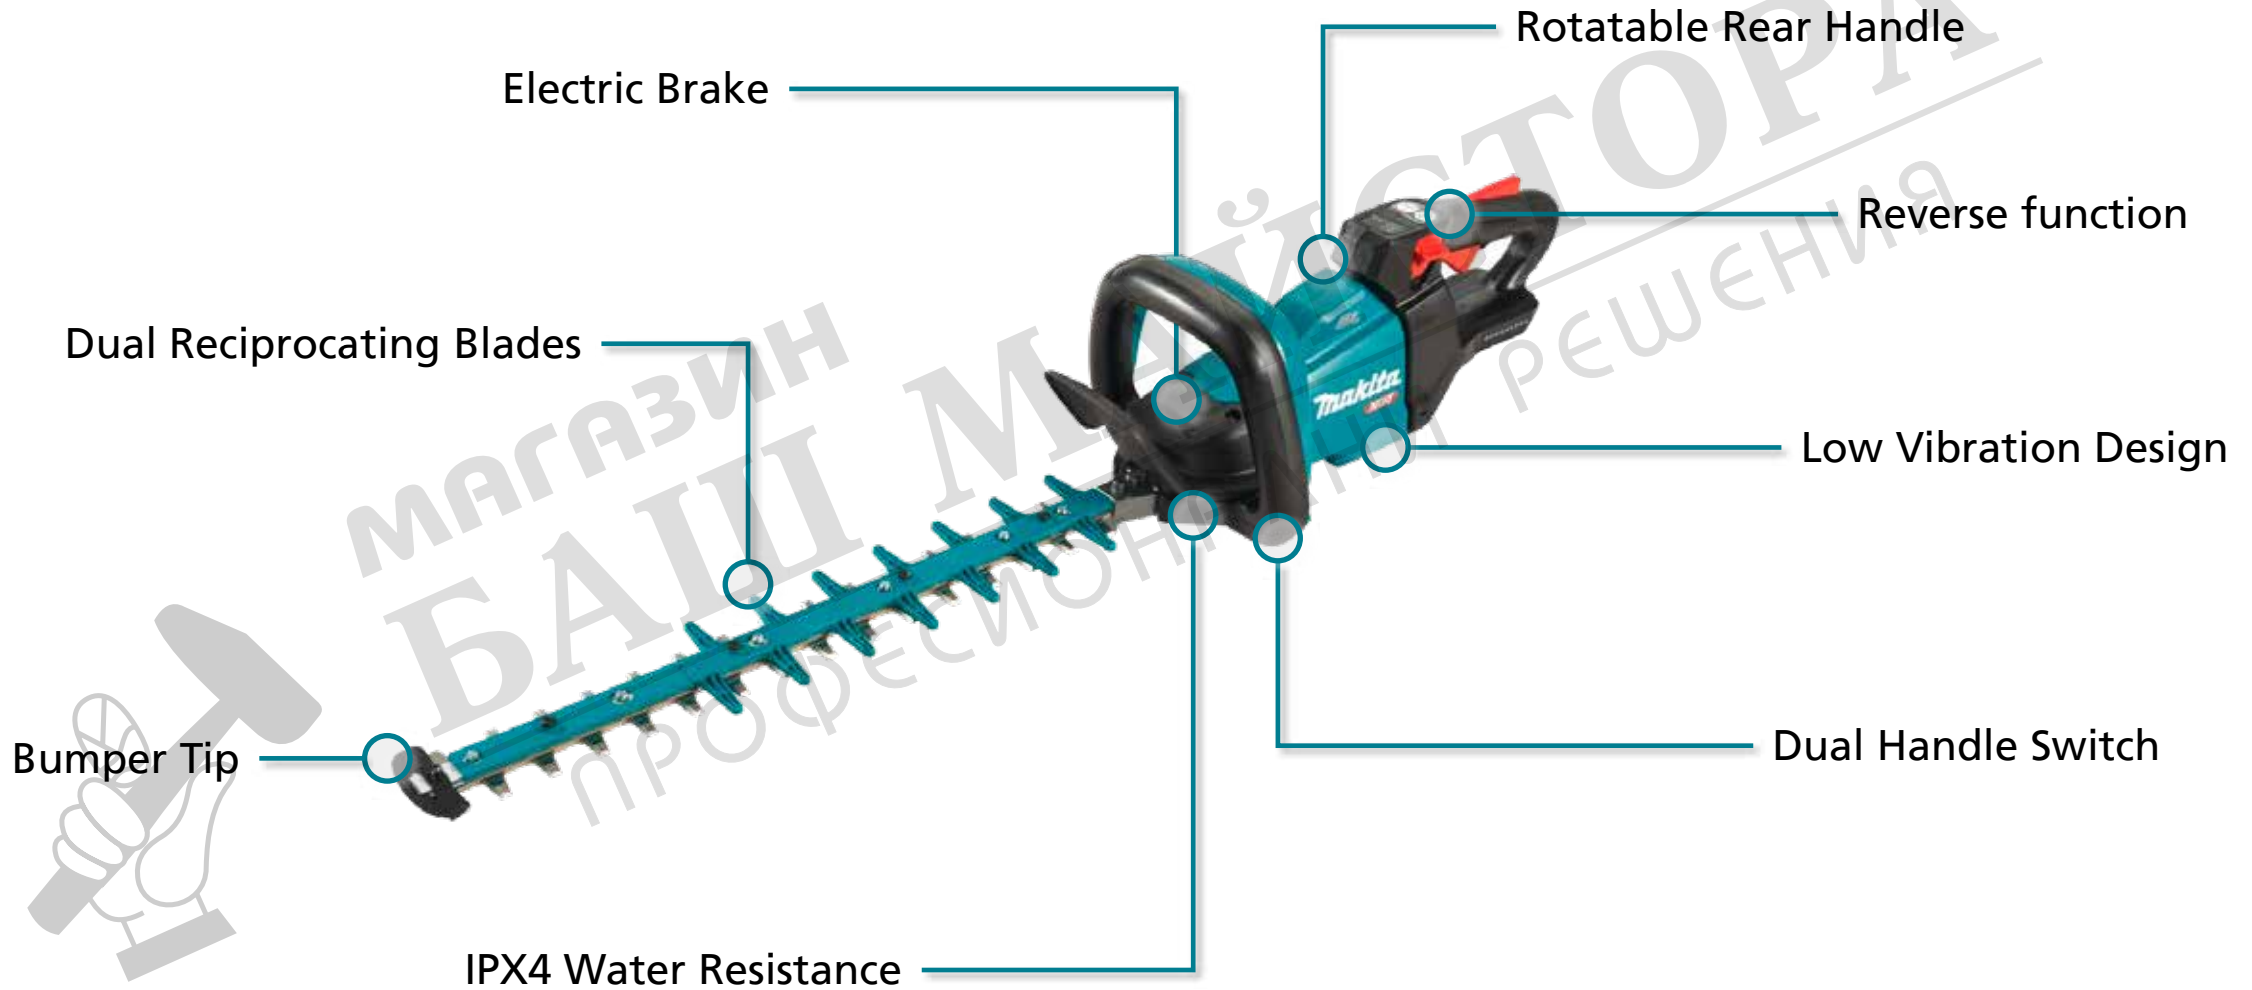

The 40V Max Brushless Hedge Trimmers are lightweight and designed for high frequency commercial users.

The rotating rear handle has 5 locking positions for comfortable operation whether you are cutting vertically or horizontally and the 3 stage speed control allows the user to adjust the operating speed to suit the application and deliver optimum power and runtime.

If the blades become jammed, the reverse function reciprocates the blades backwards to remove the debris before automatically engaging forwards again.

Product Overview

Product Specifications

	UH008	UH009
No Load Speed	Hi: 5,000spm Med: 3,600spm Lo: 2,000spm	
Blade Length	600mm	750mm
Noise	97dB	
Max Cutting Width	21.5mm	
Overall Length	1,120mm	1,262mm
Skin Weight	3.3kg	3.5kg
Weight (with BL4040)	4.3kg	4.5kg
Voltage	40V Max	

- **Reverse Mode** – Rotates the blades half a rotation in reverse to remove any debris caught between teeth before automatically switching back to forward.
- **3 Speed Selection** – Electronic speed control allows the user to adjust the strokes per minute to suit the application and extend runtime.
- **IPX4 Water Resistance** – Designed for use in wet weather situations with minimal risk of water penetration into the motor and electrical components.
- **Bumper Tip** – provides protection for the blades from bumping into the ground or solid objects and causing damage and excessive shock to the motor.
- **Constant Speed Control** – provides smooth cutting even under heavy load with thick shrubs and bushes.
- **Low Vibration Design** – Vibration from the blade mechanism to the handles is suppressed in order to increase comfort during long periods of use.
- **Rotatable Rear Handle** – 5 positions on the rear handle provide superior ergonomics for vertical or horizontal cutting applications.
- **Dual Handle Operation** – requires the user to have both hands on the tool to operate, ensuring safety and eliminating risk of injury to hands and fingers.

Heavy Duty Power

Powered by XGT 40V Max batteries allowing for continuous heavy duty operation

Convenience

Easy to use On/Off & Reverse switch remains in easy reach of end user's thumb

Ergonomics

Rotatable rear handle provides optimum ergonomics for all cutting applications

Safety

Dual hand operation provides end user safety and lowers injury risk

Standard Accessories		
A long, thin, black blade cover with a small notch at one end.	459121-9	Blade Cover (UH008)
A long, thin, black blade cover with a small notch at one end, similar to UH008 but slightly longer.	459122-7	Blade Cover (UH009)
