

CITO

DIGITAL TAPE MEASURE WITH BLUETOOTH

Precise measurement and digital documentation of measurements: CITO measures lengths of up to 5 m with a measurement tolerance of ± 1.0 mm, and shows the measurement digitally on the display – either in mm or cm. CITO quickly connects to the SOLA Measures app via Bluetooth. This allows measurements to be transferred directly from the CITO to the smartphone to dimension photos or construction plans.

HIGHLIGHTS

- › Digital measurement display in mm or cm
- › Bluetooth interface for the SOLA Measures app
- › Maximum measuring tolerance of ± 1.0 mm (digital display)
- › Two measurement reference points on the front or rear edge
- › Precise reading aid with additional stop function
- › Auto lock function: automatic tape brake when pulled out
- › Soft grip and ergonomic design
- › Automatic switch-off

APPLICATIONS

Digital measurements at the push of a button

CITO is very easy to operate. The display only has three buttons to switch the device on and off, toggle the measurement display between mm and cm, and to determine the measurement reference point. The measured value can also be transferred to the SOLA Measures app at the push of a button. The digital display is always easy to read, even in the dark and from any angle.

Two measurement reference points

For various measurement requirements, the CITO has two reference points, which can be set quickly: The measurement is carried out either from the front or rear edge of the device. What's more, for measurements from the front edge, the CITO has a practical reading aid that also acts as a stop function. This makes it easy to precisely determine lengths.

Tough casing, durable tape

The special nylon coating on the tape ensures exceptional durability and makes it extremely resistant to scratches, water, and chemicals. Equipped with protection class IP54, the CITO is protected against dust and splashes, and can be used both indoors and outdoors.

Includes practical belt case

The CITO is supplied with a belt case. A robust clip on the rear lets you quickly fasten the belt case on your belt or pocket within easy reach. The practical side pocket provides additional space for pens.

Measuring with the SOLA Measures app

The integrated Bluetooth interface enables the fast and flawless transfer of measured values from the CITO to your smartphone. The compatible SOLA Measures app lets you determine the dimensions of photos or construction plans as well as save, manage, and share measurement results with your team. This saves time and money.

ORDER INFORMATION

Included with delivery

- › CITO digital tape measure
- › USB-C charging cable
- › Belt case

CITO

Item no. 71510101

Technical Data

Length of tape	5 m
Tape graduations	mm
EC accuracy class of tape	I
Measuring tolerance (digital display)	±1.0 mm
Display	mm, cm
Operating temperature	-10°C to +50 °C
Operating time (at 20 °C)	8 hrs*
Power supply	Li- polymer battery (700 mAh)
Storage temperature	-20 °C to +60 °C
Automatic power off, device	180 s
Protection class	IP54
Tape material	Steel
Tape surface	Extruded nylon, yellow
Tape brake	Backstop
Housing material	ABS/TPE
Dimensions	155 x 45 x 85 mm

*Continuous operation

Upgrade to SOLAFLEX

SOLAFLEXready means that the CITO can be used with the SOLA-FLEX app that was specially developed for digital measurement. The app offers a practical set of functions to ensure precise and flawless measurement, which can be integrated into production processes as a DXF file: for example, for precise cutting by NC machines in prefabrication.
