For safety reasons this power tool is fitted with a switch lock and the On-/Off switch cannot be locked in the „On“ position.
Aus Sicherheitsgründen ist das Elektrowerkzeug mit einer Einschaltsperrre versehen und der Ein-/Ausschalter lässt sich nicht arretieren.
Pour des raisons de sécurité, l'outil électrique est doté d'un verrouillage de mise en marche et le commutateur de mise en marche et d'arrêt ne peut pas s'enclencher.

Per motivi di sicurezza, questo utensile elettrico è dotato di pulsante d'arresto.

Por razones de seguridad la herramienta eléctrica tiene un seguro de arranque, el interruptor de arranque no tiene la posibilidad de de encavamiento.

Por razões de segurança a ferramenta eléctrica possui um encravamento de ligação. Além disso, não é possível fixar o interruptor.

Uit veiligheidsoverwegingen is de machine van een inschakelvergrendeling voorzien en de aan-uitschakelaar is niet te vergrendelen.

Maskinen er af sikkerhedshensyn forsynet med en indkoblingsspærre.

Av sikkerhetsgrunner er elektroverktøyet utstyrt med innkoblingssporre, og av-/på-bryteren lar seg ikke låse.

För Din säkerhet är maskinen utrustad med låsknapp så strömbrytaren ej kan tryckas in.

Turvallisuusyistä on ko. sähkötyökalu varustettu kytkemisen estolla ja On-Ei-kytkintä ei voi lukita.

To ηλεκτρικό εργαλείο είναι εξοπλισμένο για λόγους ασφαλείας με μία ασφάλεια ενεργοποίησης και ο διακόπτης ενεργοποίησης/απενεργοποίησης δεν μπορεί να κλειδωθεί στην θέση ON.

Güvenlik nedenlerileyi bu aler bir kapama emniyeti ile donatılmış olup, açma/kapama şalteri kilitlenmez.

Z bezpečnostních důvodů nelze zařazovat vypínač v poloze ZAPNUTO. Z bezpečnostních dôvodov je toto elektrické rádanie vybavené blokovacím zariadením spúšťania a aretácia vypínača nie je možná.

Ze względu na bezpieczeństwo to elektronarzędzie jest wyposażone w blokadę wyłącznika, a wyłącznika On/Off nie można zablokować w pozycji On (WŁ.).

Biztonsági okokból ez a szerszám egy olyan KI/BE kapcsolóval van szerelve, ami nem rögzíthető „BE“ állásban.

Iz varnostnih razlogov je električno orodje opremljeno z zaporo vklopa in stikalo za vklop/izklop se ne da nikisirati.

Iz sigurnosnih razloga električni alat je predviđen jednim zatvaračem za uključivanje i prekidač za uključivanje i isključivanje se ne može aretrirati. Družinas noluká elektrikskie instrumenti ir aprikti ar slēža bloķētāju un slēži nevarnofiksēt.

Saugumo sumetimais elektros prietaise yra paleidimo blokavimo mechanizmas, ir negalima užfiksuoti į įjungimo/įjungimo jungiklio. Turvakaalutustel on elektritořiist varustatud sisselülitusblokeeringuga ning sisse-välja lülitit pole võimalik fikseerida.

Изображенный на рисунке инструмент оснащен блокиратором включения, который служит для предотвращения самоприводного или случайного включения.

От съображения за безопасност електрическият инструмент има блокировка на включването и бутонът за включване и изключване не може да се блокира.

Din motive de securitate aceasta scula electrică este dotată cu un blocaj pe comutator iar comutatorul Pornire / Împrire nu poate fi blocat în poziția „Pornit“

Од безбедносни причини оваа машина е обезбедена со прекинувач којница така што прекинувачот за вклучување не може да се заклучи во вклучена позиција.

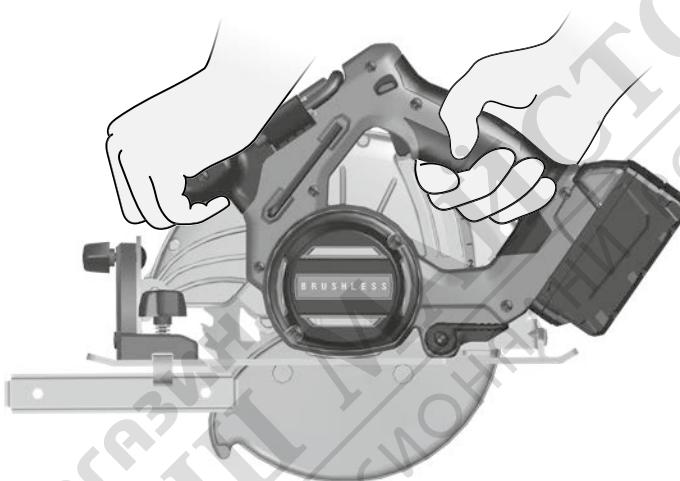

Для цілей безпеки електроінструмент обладнаний механізмом блокування проти включення; вимикач/вимикач неможливо заблокувати.

لأسباب تتعلق بالسلامة تم تزوييد هذه الأداة الكهربائية بفتح قفل كهربائي مترافق مع مفتاح التشغيل/الإيقاف في الوضع “تشغيل”.

Adjust the cutting depth to the thickness of the workpiece. Less than a full tooth of the blade teeth should be visible below the workpiece.

Passen Sie die Schnitttiefe an die Dicke des Werkstücks an. Es sollte weniger als eine volle Zahnhöhe unter dem Werkstück sichtbar sein.

Adapter la profondeur de coupe à l'épaisseur de la pièce. Moins d'une dent complète devrait apparaître sous la pièce.

Adattare la profondità di taglio allo spessore del pezzo in lavorazione. Nella parte inferiore del pezzo in lavorazione dovrebbe essere visibile meno della completa altezza del dente.

Adaptar la profundidad de corte al grosor de la pieza de trabajo. La hoja de sierra no deberá sobresalir más de un diente de la pieza de trabajo.

Adaptar a profundidade de corte à espessura da peça a ser trabalhada. Deveria estar visível por aproximadamente menos do que uma altura de dente abaixo da peça a ser trabalhada.

Pas de zaagdiepte aan de dikte van het werkstuk aan. Er dient minder dan een volledige tandhoogte onder het werkstuk zichtbaar te zijn.

Tilpas skæredybden efter arbejdsemnets tykkelse. Der må maksimalt være en hel tandhøjde synlig under emnet.

Tilpass skjæredybden til tykkelsen på arbeidsstykket. Det skal være mindre enn en full tannhøyde synlig under arbeidsstykket.

Anpassa sågdjupet till arbetsstykets tjocklek. Den synliga delen av en tand under arbetsstykset måste vara mindre än en hel tand.

Aseta leikkausyvyys työkappaleen paksuuden mukaan. Työkappaleen alla tulisi terää näkyä korkeintaan täysi hammaskorkeus.

Προσαρμόστε το βάθος κοπής στο πάχος του υπό κατεργασία τεμαχίου. Κάτω το υπό κατεργασία τεμάχιο πρέπει να φαίνεται λιγότερο από ένα ολόκληρο δόντι του πριονόδισκου.

Kesme derinliğinin iş parçasının kalınlığına göre ayarlayın. İş parçası altında tam diş uzunluğunu daha az görürmelidir.

Přizpůsobte hloubku řezu tloušťce obrubku. Pod obrubkem by měla být viditelná méně než celá výška zuba.

Hrubku rezu prispôsobte hrúbke obrubka. Pod obrubkom by malo byť vidieť menej pilového listu ako plnú výšku zuba pily.

Głębokość cięcia należy dopasować do grubości obrabianego przedmiotu. Powinno być widoczne mniej jak pełna wysokość zębów pod obrabianym przedmiotem.

A vágási mélységet a munkadarab vastagságának megfelelően kell megválasztani. A fűrészlapból a munkadarab alatt kevesebb mint egy teljes fogmagasságnyiak kell kíllatszania.

Prosímo, da globino reza prilagodite debelini obdelovanca. Znaš na manj kot višina zoba, ki je vidna pod obdelovancem.

Prilagodite dubinu rezanja deblijini izratka. Ispod izratka treba biti vidljiv manje od jedan puni zub.

Izvēlieties zāīčanas dzīuumu, kas atbilst zāīčjamā priekšķometam biezumam. Zāīčanas dzīuumam jābūt tik lielam, lai zem zāīčjamā priekšķometa redzamās asmens daļas augstums būtu mazāks par asmens zobu augstumu.

Pjovimo gylā tinkamai nustatykite pagal ruođinio storą. Ruođinio apačioje turí matytis diek tiek mapiau, nei per visą pjūklo danties aukštą, iðlindusi diskø dalis.

Kohandage lõikesügavus tooriku paksusega. Saeketas võib tooriku alt vähem kui ühe täishamba vörä välja ulatuda.

Установливайте глубину реза в соответствии с толщиной детали. Под деталью пильное полотно не должно высовываться более чем на один зуб.

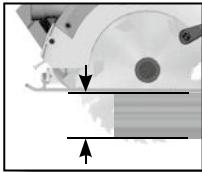

Винаги настройвайте дълбочината на рязане съобразно дебелината на стената на обработвания детайл. От обратната страна на детайла диска трябва да се подава на разстояние, по-малко от една височина на зъба.

Adaptați adâncimea de tăiere la grosimea piesei de lucru. Sub piesa de lucru ar trebui să se vadă mai puțin de înălțimea întreagă a unui dintă.

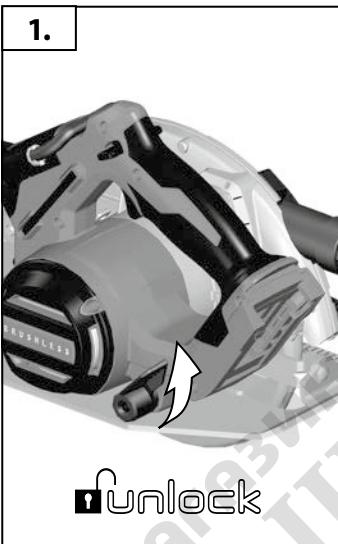

Priyalagodete ja dlabochinata na zasekot vo zavisnost od gustinata na obrabotuvannoto parče. Neшто помалку од цел забец од сечилото треба да биде видлив под работното парче.

Глибина різання повинна відповісти товщині заготовки.

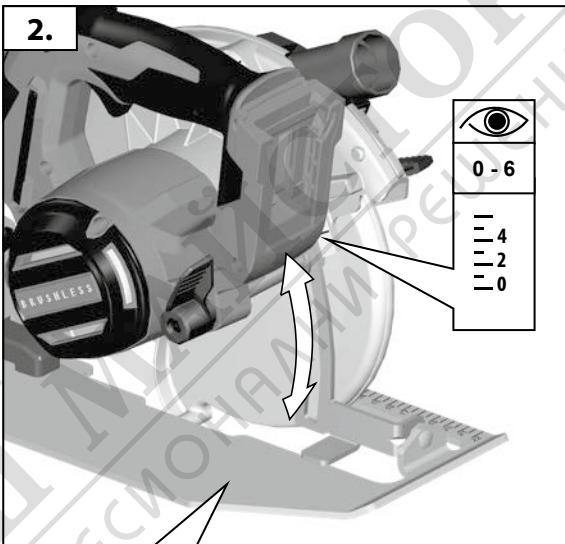

اضبط عمق القطع وفقاً لسمك قطعة العمل. يجب أن تظهر الأسنان أقل من كامل طرلها تحت قطعة العمل.

If a correction of the 90° angle of the guide-plate to the saw blade is necessary, use the correction screw.

Falls eine Korrektur des 90° Winkels der Führungsplatte zum Sägeblatt nötig ist, diese mit der Korrekturschraube durchführen

Si une correction de l'angle à 90° de la plaque de base par rapport à la lame de scie s'avère nécessaire, il convient alors d'avoir recours à la vis de correction.

Nella caso in cui si rendesse necessaria una correzione dell'angolo di 90° della piastra di base rispetto alla lama, questa potrà essere effettuata agendo sulla vite di correzione.

Si es necesario un ajuste o corrección de perpendicularidad (90°) del disco de sierra actuando sobre el tornillo de ajuste.

Caso se torne necessário corrigir a esquadria da base em relação ao disco de corte, agir sobre o parafuso de afinação.

Indien een korrektie van de 90° hoek van de bodemplaat ten opzichte van het zaagblad nodig is kan deze worden gekorregeerd met de korrektieschroef.

Såfremt det er nødvendigt med en korrektion af bundpladens 90° vinkel i forhold til svaklingen, gennemføres denne med korrektionsskruen.

Hvis det er nødvendig å foreta en justering av 90°-vinkelen på føringsplaten i forhold til

sagbladet, må dette gjøres med justeringsskruen.

Med ställskruv är det möjligt att justera 90°-vinkeln, bottenplatta till sägklingen.

Mikäli pohjalevyn 90°-kulman oikaisu sahanterän nähdien on tarpeen, oikaisu suoritetaan oikaisuruuvista.

Kilavuz levhanın testere bir açığında 90°lik konumunda bir düzeltme gerekiyorsa, bunu düzeltme vidası ile yapın.

Je-li nutná oprava kolmosti vodící desky k pilovému kotouči, provedte to nastavovacím šroubem.

Ak je potrebná korektúra 90° uhu vodiacej platne k pilovému listu, použite korekčnú skrutku.

Jeżeli konieczne jest skorygowanie kąta ustawienia płytki prowadzącej 90° w stosunku do brzeszcza, należy wykorzystać do tego celu śrubę regulacyjną.

Ha az alaplap és a fűrészlap által bezárt 90 fokos szög korekciónára szorul, használja az állító csavart.

Če je potrebna korektura 90° kota vodilne ploče k žaginemu listu, to opravite s pomočju korekturnega vijaka.

Ako je potrebná korektura kuta vodeče ploče od 90° prema listu pile, ovu izvesti sa vijkom za korekturu.

Gadjiumā, ja nepieciešama atbalsta plāksnes 90° leņķa korekcija attiecībā pret zāga rīpu, izmantojiet korekcijas skrūvi.

Jei tarp kreipiamosiųjų ir pjūklu reikalinga 90° laipsnių pataisa, tai atlikite pataisos varžtu.

Juhul kui on vaja parandada juhtplaadi 90° nurka saelehe suhtes, siis tehke seda korriigeeriva kruviga.

Для регулировки угла 90 град направляющей шины пильного полотна служит

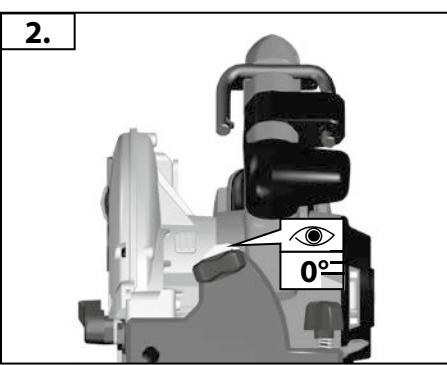

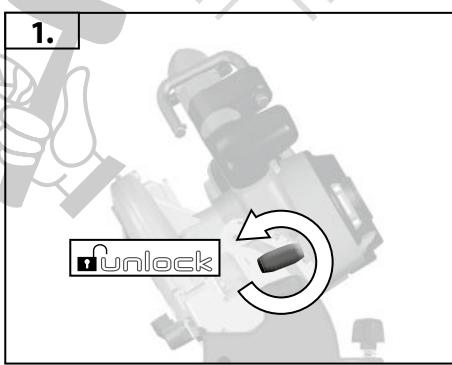

регулировочный винт Ако е необходима корекция на ъгъла от 90° наводещата плоча спрямо режещия диск, направете я с коригиращия винт.

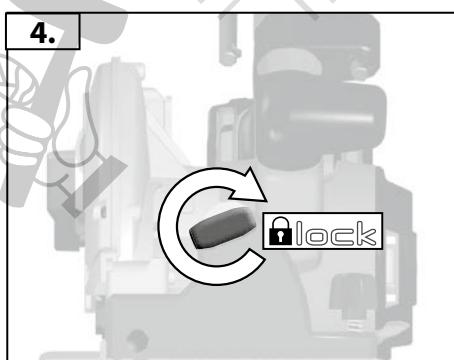

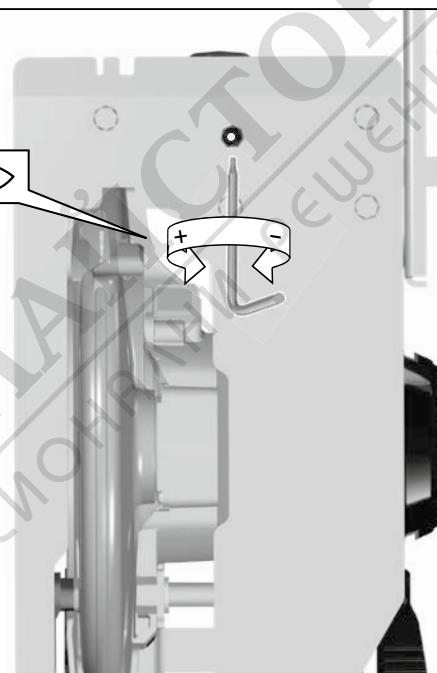

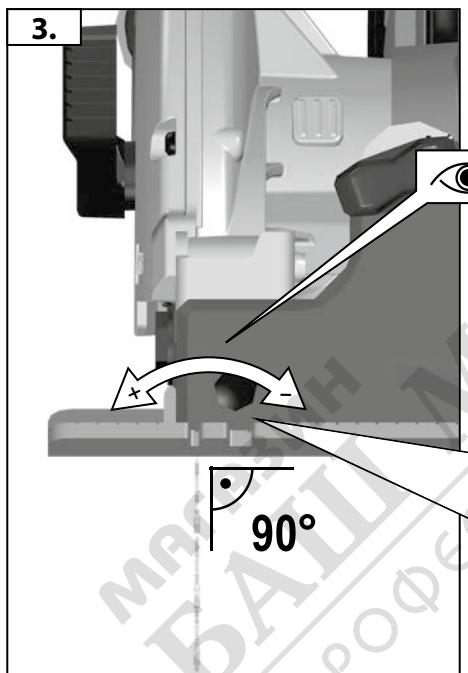

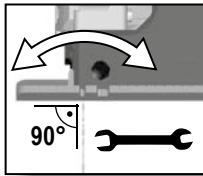

Dacă este necesară o corecție în unghi de 90° a plăcii de ghidare față de lama ferastrăului, utilizați șurubul de corecție.

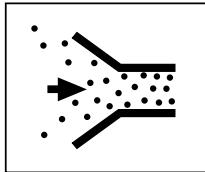

Доколку е потребно коригирање на аголот од 90° водечката површина кон сечилото на пилата, користет го шрафт за корекција.

Якщо необхідна корекція кута 90° напрямної пластини пилкового диску, виконати корекцію за допомоги регулювального гвинта

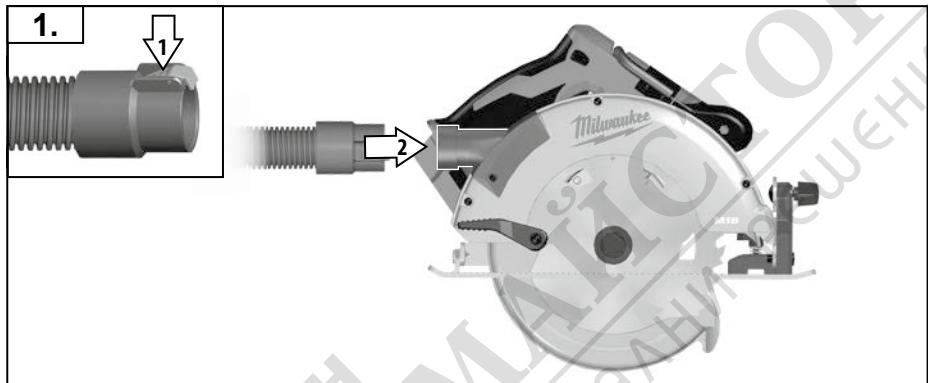

إذا تطلب الأمر تصحيح الزاوية المائية للوح التوجيه الخاصة بشفرة المنشار، استخدم برجي التصحيح لقيام بذلك.

XI

TECHNICAL DATA		M18 BLCS66		
Circular saw				
Production code	4679 20 04 000001-999999			
Battery voltage	18 V			
No-load speed	5000 min ⁻¹			
Saw blade dia. x hole dia	190 x 30 mm			
Saw blade thickness	1,6 mm			
Blade teeth	24			
Max. Cutting depth at 0° / 45° / 50°	66 / 48 / 46 mm			
Weight according EPTA-Procedure 01/2014 (Li-Ion 2,0 Ah ... 5,0 Ah)	3,7...4,0 kg			
Recommended Ambient Operating Temperature	-18°C ... +50°C			
Recommended battery types	M18B2...M18B5			
Recommended charger	M1418C6; M12-18...			
Noise information				
Measured values determined according to EN 62841. Typically, the A-weighted noise levels of the tool are:				
Sound pressure level (Uncertainty K=3dB(A))	83,2 dB(A)			
Sound power level (Uncertainty K=3dB(A))	94,2 dB(A)			
Wear ear protectors!				
Vibration information				
Vibration total values (triaxial vector sum) determined according to EN 62841				
Sawing of wood (Li-Ion 2,0 Ah): Vibration emission value a _{h,W}	2,0 m/s ²			
Uncertainty K=	1,5 m/s ²			

WARNING

The vibration and noise emission level given in this information sheet has been measured in accordance with a standardized test given in EN 62841 and may be used to compare one tool with another. It may be used for a preliminary assessment of exposure.

The declared vibration and noise emission level represents the main applications of the tool. However if the tool is used for different applications, with different accessories or poorly maintained, the vibration and noise emission may differ. This may significantly increase the exposure level over the total working period.

An estimation of the level of exposure to vibration and noise should also take into account the times when the tool is switched off or when it is running but not actually doing the job. This may significantly reduce the exposure level over the total working period.

Identify additional safety measures to protect the operator from the effects of vibration and/or noise such as: maintain the tool and the accessories, keep the hands warm, organization of work patterns.

Wear ear protectors. Exposure to noise can cause hearing loss.

A **WARNING** Read all safety warnings, instructions, illustrations and specifications provided with this power tool. Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference.

A CIRCULAR SAW SAFETY WARNINGS

Cutting procedures

a) **A DANGER: Keep hands away from cutting area and the blade. Keep your second hand on auxiliary handle, or motor housing.** If both hands are holding the saw, they cannot be cut by the blade.

b) **Do not reach underneath the workpiece.** The guard cannot protect you from the blade below the workpiece.

c) **Adjust the cutting depth to the thickness of the workpiece.** Less than a full tooth of the blade teeth should be visible below the workpiece.

d) **Never hold the workpiece in your hands or across your leg while cutting. Secure the workpiece to a stable platform.** It is important to support the work properly to minimise body exposure, blade binding, or loss of control.

e) **Hold the power tool by insulated gripping surfaces, when performing an operation where the cutting accessory may contact hidden wiring.** Contact with a „live“ wire will also make exposed metal parts of the power tool „live“ and could give the operator an electric shock.

f) **When ripping, always use a rip fence or straight edge guide.** This improves the accuracy of cut and reduces the chance of blade binding.

g) **Always use blades with correct size and shape (diamond versus round) of arbour holes.** Blades that do not match the mounting hardware of the saw will run off-centre, causing loss of control.

English

h) Never use damaged or incorrect blade washers or bolt. The blade washers and bolt were specially designed for your saw, for optimum performance and safety of operation.

Kickback causes and related warnings

- kickback is a sudden reaction to a pinched, jammed or misaligned saw blade, causing an uncontrolled saw to lift up and out of the workpiece toward the operator;
- when the blade is pinched or jammed tightly by the kerf closing down, the blade stalls and the motor reaction drives the unit rapidly back toward the operator;
- if the blade becomes twisted or misaligned in the cut, the teeth at the back edge of the blade can dig into the top surface of the wood causing the blade to climb out of the kerf and jump back toward the operator.

Kickback is the result of saw misuse and/or incorrect operating procedures or conditions and can be avoided by taking proper precautions as given below.

a) Maintain a firm grip with both hands on the saw and position your arms to resist kickback forces. Position your body to either side of the blade, but not in line with the blade. Kickback could cause the saw to jump backwards, but kickback forces can be controlled by the operator, if proper precautions are taken.

b) When blade is binding, or when interrupting a cut for any reason, release the trigger and hold the saw motionless in the material until the blade comes to a complete stop. Never attempt to remove the saw from the work or pull the saw backward while the blade is in motion or kickback may occur. Investigate and take corrective actions to eliminate the cause of blade binding.

c) When restarting a saw in the workpiece, centre the saw blade in the kerf so that the saw teeth are not engaged into the material. If a saw blade binds, it may walk up or kickback from the workpiece as the saw is restarted.

d) Support large panels to minimise the risk of blade pinching and kickback. Large panels tend to sag under their own weight. Supports must be placed under the panel on both sides, near the line of cut and near the edge of the panel.

e) Do not use dull or damaged blades. Unsharpened or improperly set blades produce narrow kerf causing excessive friction, blade binding and kickback.

f) Blade depth and bevel adjusting locking levers must be tight and secure before making the cut. If blade adjustment shifts while cutting, it may cause binding and kickback.

g) Use extra caution when sawing into existing walls or other blind areas. The protruding blade may cut objects that can cause kickback.

Lower guard function

a) Check the lower guard for proper closing before each use. Do not operate the saw if the lower guard does not move freely and close instantly. Never clamp or tie the lower guard into the open position. If the saw is accidentally dropped, the lower guard may be bent. Raise the lower guard with the retracting handle and make sure it moves freely and does not touch the blade or any other part, in all angles and depths of cut.

b) Check the operation of the lower guard spring. If the guard and the spring are not operating properly, they must be serviced before use. Lower guard may operate sluggishly due to damaged parts, gummy deposits, or a build-up of debris.

c) The lower guard may be retracted manually only for special cuts such as „plunge cuts“ and „compound cuts“. Raise the lower guard by the retracting handle and as soon as the blade enters the material, the lower guard must be released. For all other sawing, the lower guard should operate automatically.

d) Always observe that the lower guard is covering the blade before placing the saw down on bench or floor. An unprotected, coasting blade will cause the saw to walk backwards, cutting whatever is in its path. Be aware of the time it takes for the blade to stop after switch is released.

Additional Safety and Working Instructions

Wear ear protectors. Exposure to noise can cause hearing loss. Use protective equipment. Always wear safety glasses when working with the machine. The use of protective clothing is recommended, such as dust mask, protective gloves, sturdy non-slip footwear, helmet and ear defenders.

The dust produced when using this tool may be harmful to health. Do not inhale the dust. Use a dust absorption system and wear a suitable dust protection mask. Remove deposited dust thoroughly, e.g. with a vacuum cleaner.

Do not use saw blades not corresponding to the key data given in these instructions for use.

It is necessary to select a saw blade which is suitable for the material being cut.

Use only woodworking blades specified in this manual, which comply with EN 847-1.

The rated speed of the accessory must be at least equal to the maximum speed marked on the power tool.

Do not fix the on/off switch in the „on“ position when using the saw hand-held.

Do not use abrasion discs in this machine!

Remove the battery pack before starting any work on the appliance.

WARNING! To reduce the risk of fire, personal injury, and product damage due to a short circuit, never immerse your tool, battery pack or charger in fluid or allow a fluid to flow inside them. Corrosive or conductive fluids, such as seawater, certain industrial chemicals, and bleach or bleach containing products, etc., Can cause a short circuit.

Use only System M18 chargers for charging System M18 battery packs. Do not use battery packs from other systems.

Never break open battery packs and chargers and store only in dry rooms. Keep dry at all times.

WORKING INSTRUCTIONS

Adapt the feed speed to avoid overheating the blade tips.

SPECIFIED CONDITIONS OF USE

This electronic circular saw can cut lengthways and mitre accurately in wood.

ELECTRIC BRAKE

The electric brake engages when the trigger is released, causing the blade to stop and allowing you to proceed with your work. Generally, the saw blade stops within two seconds. However, there may be a delay between the time you release the trigger and when the brake engages. Occasionally the brake may miss completely. If the brake misses frequently, the saw needs servicing by an authorized Milwaukee service facility. You must always wait for the blade to stop completely before removing the saw from the workpiece.

BATTERIES

Battery packs which have not been used for some time should be recharged before use.

Temperatures in excess of 50°C (122°F) reduce the performance of the battery pack. Avoid extended exposure to heat or sunshine (risk of overheating).

The contacts of chargers and battery packs must be kept clean.

For an optimum life-time, the battery packs have to be fully charged, after use. Battery packs which have not been used for some time should be recharged before use.

To obtain the longest possible battery life remove the battery pack from the charger once it is fully charged.

For battery pack storage longer than 30 days: Store the battery pack where the temperature is below 27°C and away from moisture. Store the battery packs in a 30% - 50% charged condition. Every six months of storage, charge the pack as normal.

Do not dispose of used battery packs in the household refuse or by burning them. Milwaukee Distributors offer to retrieve old batteries to protect our environment.

Do not store the battery pack together with metal objects (short circuit risk).

Battery acid may leak from damaged batteries under extreme load or extreme temperatures. In case of contact with battery acid wash it off immediately with soap and water. In case of eye contact rinse thoroughly for at least 10 minutes and immediately seek medical attention.

No metal parts must be allowed to enter the battery section of the charger (short circuit risk).

BATTERY PACK PROTECTION

In extremely high torque, binding, stalling and short circuit situations that cause high current draw, the tool will stop for about 2 seconds and then the tool will turn OFF. To reset, release the trigger.

Under extreme circumstances, the internal temperature of the battery pack could raise too much. If this happens, the fuel gauge will flash until the battery pack cooled down. After the lights go off, the work may continue. Place the battery on the charger to charge and reset it.

TRANSPORTING LITHIUM BATTERIES

Lithium-ion batteries are subject to the Dangerous Goods Legislation requirements.

Transportation of those batteries has to be done in accordance with local, national and international provisions and regulations.

The user can transport the batteries by road without further requirements.

Commercial transport of Lithium-Ion batteries by third parties is subject to Dangerous Goods regulations. Transport preparation and transport are exclusively to be carried out by appropriately trained persons and the process has to be accompanied by corresponding experts.

When transporting batteries:

Ensure that battery contact terminals are protected and insulated to prevent short circuit. Ensure that battery pack is secured against movement within packaging. Do not transport batteries that are cracked or leak. Check with forwarding company for further advice

MAINTENANCE

Remove the battery pack before starting any work on the appliance.

Be sure to disconnect the tool from the power supply before attaching or removing the saw blade.

Clean tool and guarding system with dry cloth.

Certain cleaning agents and solvents are harmful to plastics and other insulated parts.

Keep the apparatus handle clean, dry and free of spilt oil or grease.

Check the function of guards.

Regular maintenance and cleaning provide for a long service life and safe handling.

The ventilation slots of the machine must be kept clear at all times.

Remove dust regularly. Remove the sawdust which has accumulated inside the saw in order to avoid the risk of fire.

Use only Milwaukee accessories and Milwaukee spare parts. Should components need to be replaced which have not been described, please contact one of our Milwaukee service agents (see our list of guarantee/service addresses).

If needed, an exploded view of the tool can be ordered. Please state the Article No. as well as the machine type printed on the label and order the drawing at your local service agents or directly at: Techtronic Industries GmbH, Max-Eyth-Straße 10, 71364 Winnenden, Germany.

EC-DECLARATION OF CONFORMITY

We declare under our sole responsibility that the product described under "Technical Data" fulfills all the relevant provisions of the directives
2011/65/EU (RoHS)
2006/42/EC
2014/30/EU
and the following harmonized standards have been used.

EN 62841-1:2015
EN 62841-2-5:2014
EN 55014-1:2017+A11:2020
EN 55014-2:2015
EN IEC 63000:2018

SYMBOLS

CAUTION! WARNING! DANGER!

Please read the instructions carefully before starting the machine.

Always wear goggles when using the machine.

Wear gloves!

Do not use force.

Wear ear protectors.

Wear a suitable dust protection mask.

Remove the battery pack before starting any work on the appliance.

Accessory - Not included in standard equipment, available as an accessory.

Do not dispose electric tools, batteries/rechargeable batteries together with household waste material.
Electric tools and batteries that have reached the end of their life must be collected separately and returned to an environmentally compatible recycling facility. Check with your local authority or retailer for recycling advice and collection point.

Rotation direction

No-load speed

Voltage

Direct Current
